

50TH ANNIVERSARY

February 5-7, 2026 | Everline Resort, Olympic Valley, CA

PVSS | VESS

Peripheral Vascular Surgery Society | Vascular & Endovascular Surgery Society

Vascular and Endovascular Surgery Society

The Vascular and Endovascular Surgery Society (formerly the Peripheral Vascular Surgery Society) was founded in 1976 as a national forum for young fellowship-trained peripheral vascular surgeons. From a modest beginning as the Peripheral Vascular Surgery Club, it has grown from an original 19 to over 1000 Active, Senior & Candidate members. It remains, however, the only national vascular organization that requires specific fellowship training in general vascular surgery as a prerequisite for membership. To ensure the Society's commitment to the young vascular surgeon, active members must become senior members after 15 years. Both active and senior members are urged to attend and participate in the Annual Winter Meeting as well as the Spring Meeting held the day preceding the Vascular Annual Meeting (VAM).

Surgical specialties and the organizations that represent them arise to fill a need. In the early 1970's, a need arose for surgeons specifically trained in the diagnosis, non-operative and operative management of peripheral vascular disorders. As these trainees emerged from fellowship programs throughout the country, the additional need arose to provide a national forum through which these young fellowship-trained peripheral vascular surgeons could informally meet, exchange ideas, and mutually promote the new specialty of peripheral vascular surgery.

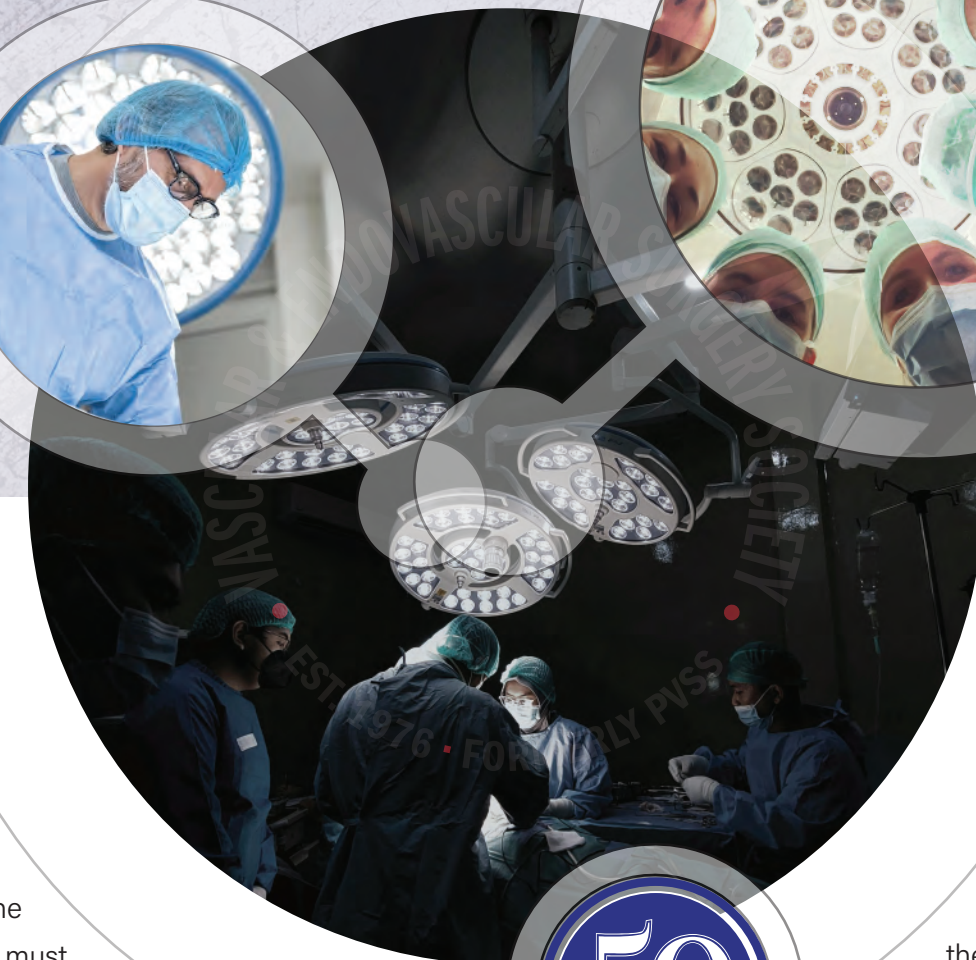

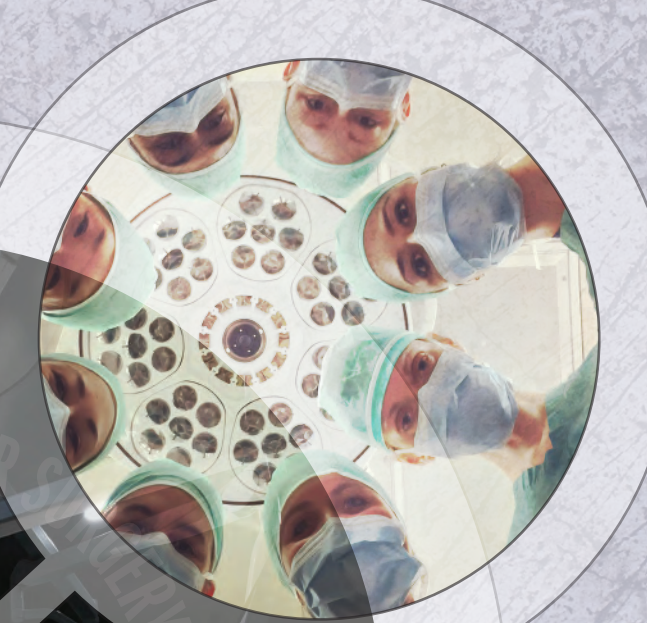

We encourage you to invest early in yourself and your career by joining the Vascular & Endovascular Surgery Society (VESS). The Society boasts over 1,300 Active & Candidate members who stand committed to the development of early career, fellowship-trained vascular surgeons.

The Future of Vascular Surgery Is Here.

VESS hosts two national meetings, the Annual Spring Meeting and the Annual Winter Meeting.

Our meetings foster an encouraging, collaborative environment geared to early career vascular surgeons interested in sharing and benefiting from the exchange of ideas based in basic/translational science, educational, clinical or health outcomes research.
